Longevity Science 2400 IU 90-count gelcaps
SRP ~~\$9.95~~ - now \$2.00 with any purchase over
\$50 including shipping

Low Vitamin D levels are common - medical conditions like obesity, celiac disease, Crohn's disease, cystic fibrosis, and diseases of the liver and kidney can cause further deficiencies.

We know that Vitamin D is important for bone and immune health, but new research suggests that it might have cognitive benefits as well. Low Vitamin D levels in older adults have been linked to impairment of memory and executive function skills like planning and problem solving.¹

Longevity Science Vitamin D products contain no yeast, wheat, gluten, sugar, soy, egg, dairy, fish, shellfish, nuts, preservatives, artificial colors, or flavors.
